

The Sales and Service of Systems and Spare Parts

Sales | Consulting | Servicing | Support | Training

Vacuum Technology

Our Company

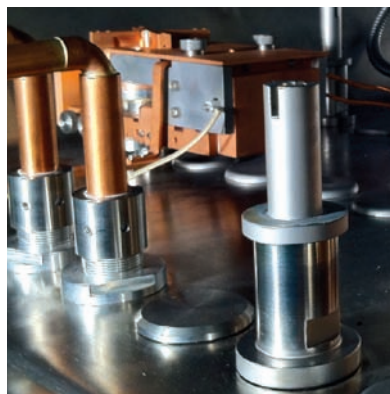

Formed in 2003, Highland Scientific is an internet trading company which has progressed steadily earning a reputation as one of the leading suppliers in the industry.

Our primary business is the remanufacture of deposition systems, high tech spare parts and instrumentation. These include, thin film deposition tools to the Semiconductor, Precision Optical, Ophthalmic, Defence, Research & Development and University Markets.

Our products, systems and services are continuously meeting the needs of customers across a broad spectrum of applications & industries.

While an aspect of our business is sales and service, Highland Scientific also has many exciting Research and Development projects. Currently, we are working on new innovative and practical technologies for the high and ultra high vacuum industry.

Highland Scientific is committed to helping businesses and provides a professional and friendly service with expert knowledge.

Sales

We source and supply spare parts and components from a wide variety of manufacturers across the globe. This allows us to evaluate your requirements and give you the right solution at an affordable price. We can also manufacture high precision parts and assemblies with specialised materials in our onsite CNC tool room facility.

We pride ourselves on carrying a multi-million pound inventory which allows us to offer a rapid, off the shelf response to customer requests with flexibility and fast delivery being key.

Systems

At Highland Scientific we have the capability to build new high quality systems or upgrade and retrofit existing ones. We can help you design a complete system and service for your individual specification. This can include the full build, an onsite installation and process development assistance among many other services.

Training

We offer a wide selection of high quality certified training packages specifically designed to meet the needs of a variety of industries. Training can be presented on customer sites worldwide or at our specialist training facility. Each training programme is specifically designed for our customer's need and we take into account all levels of experience and expertise. Please phone or email us for an updated training course list.

Services

Highland Scientific offers a wide selection of services to the high vacuum and thin film deposition industries.

We are available to supply an Emergency Call out Repairs Service with a standard response time of less than 24 hours.

In addition to emergency call outs, we are able to provide onsite scheduled servicing and technical support for high vacuum coating plants and control systems. This includes preventative maintenance and servicing contracts.

We are also able to offer our expertise in helium leak detection, and residual gas analysis service for vacuum foot printing.

We are specialists in High Voltage solutions and can assist with upgrades, power supply issues and faults.

“ Our business is built on dedicated individuals with a passion and expert knowledge of vacuum practice. ”

Factory Address:

Highland Scientific
Unit 20, Bedford Business Centre
Mile Road, Bedford MK42 9TW
United Kingdom

Highland Scientific is located on the Bedford Business Centre off Mile Road. We are just 46 miles north of London. This central location provides rapid access routes to all four of London's airports with excellent road and railway communications.

Our Awards

Our reputation is built on the delivery of high-quality products and technical services to meet our customers' demands. We have been awarded several certificates which support our company policies. Among them are the ISO 9001, ISO 14001 and OHSAS 18001. We are also proud members of the following institutes: NMI, Bedford Chamber of Commerce, The Guild of Master Craftsmen and the FSB.

A Member of the
Bedfordshire and Luton
Chamber of Commerce
The Ultimate Business Network

Training

We provide certified training for plant operators, maintenance technicians and engineers in vacuum technology and high voltage. This can be undertaken here in our training facility or at a customer site worldwide.

Sales Support

Our specialist knowledge allows us to offer sales support to help you find the right product for your application. All of our products come with a 12 month warranty and our engineers can assist with after sales support and installation.

Programming Solutions

We specialise in creating and installing controllers for many applications. We have created our own VCP610-ECO pumping controller which can be integrated with a range of deposition controllers to maximise the potential of any production system.

Custom Solutions

We offer custom solutions and flexible packages to meet the individual requirements of each customer without unnecessary expense or time.

Please contact us with your vacuum needs to discuss further.
